Installation Diagram

Connecting The Transmitter
1. Connect the output of component video source to the video input of the transmitter using RCA to RCA cable.
2. Connect audio source to the audio input of the transmitter using audio RCA cable.
3. In the back of the unit connect the CAT5 cable that will connect to the receiver.

Connecting The Receiver
1. Connect CAT5 cable (coming from the transmitter) to the back of the receiver.
2. Connect display monitors to the RCA connectors on the front of the receiver.
3. Connect a set of external speakers to the audio output connections on the front of the unit.

Adjusting and Tuning the Signal
In order to fine tune the signal, adjust the individual dials one at a time starting with GREEN, then BLUE, and lastly RED. As you turn the dials you will notice the colors slightly change as you increase or decrease the strength. All dials should be around the same distance.
