SM-UVH-2S

2-PORT SINGLE-HEAD UNIVERSAL DP & HDMI KVM SWITCH

ACCESS AND CONTROL UP
TO 2 COMPUTERS WITH ANY
COMBINATION OF DP OR
HDMI CONNECTIONS FROM A
SINGLE USB KEYBOARD, MOUSE,
AND MONITOR

Quick Start Guide

UNIVERSAL DP & HDMI KVM

Unlike traditional KVM switches that lock you into a single format, the SM-UVH-2S is a universal solution that supports both DisplayPort and HDMI sources and monitors. You can mix and match DP and HDMI PCs and displays across the same unit without compromise, solving a growing challenge in multi-format environments.

BUILT TO LAST – RELIABLE & SECURE

This tried-and-true design incorporates separate DisplayPort and HDMI connectors on every port, ensuring full compatibility while maintaining a slim rackmount form factor. The proprietary connector layout is safer and more robust than competitor designs, reducing the risk of damage from repeated use and making it ideal for demanding professional environments.

CRISP 4K UHD PERFORMANCE

Supporting up to 4K@60Hz Ultra HD resolution, the SM-UVH-2S delivers pixelperfect clarity with zero signal loss, even in the most demanding workflows. Whether in medical imaging, command and control, or financial trading floors, the video quality stays sharp and stable.

HOTKEY AND RS232 SERIAL CONTROL

The settings for the connection are as follows:
Baudrate **115200**; Data Bits **8**; Parity **None**; Stop Bits **1**;
Flow Control **None**.
The following commands can be used for RS-232 with available keyboard hotkeys:

HARDWARE INSTALLATION

1. Ensure that power is turned off or disconnected from the unit and the computers.
2. Use a DP or HDMI cable to connect the DP or HDMI output port from each computer to the corresponding DP/HDMI IN ports of the unit.
3. Use a USB cable (Type-A to Type-B) to connect a USB port on each computer to the respective USB ports of the unit.
4. Optionally connect a stereo audio cable (3.5mm to 3.5mm) to connect the audio output of the computers to the AUDIO IN ports of the unit.
5. Connect a monitor to the DP/HDMI OUT console port of the unit using a DP or HDMI cable.
6. Connect a USB keyboard and mouse in the two USB console ports.
7. Optionally connect stereo speakers to the AUDIO OUT port of the unit.
8. Finally, power on the KVM by connecting a 12VDC power supply to the power connector, and then turn on all the computers.

Note: You can connect up to 2 computers to the 2 port KVM.
