

N2N-AV OVER IP SOFTWARE

N2N MANAGER

Centralized desktop management
for the complete N2N-AV system

Discover and configure N2N-AV endpoints, manage users and permissions, and monitor live sources through multiview from one application.

Device discovery
Find N2N-AV endpoints
on the local network

Access control
Create users and assign
permissions

Live Preview
View and monitor
live sources

Multiview
Build 2x2 or custom
viewing grids

Manage the entire N2N-AV system from one console

Search the network, review endpoint status, and apply device or network changes without moving between separate tools

01

Discover endpoints

Search the local network and populate one live device table.

02

Configure devices

Update device identity, model, IP address, subnet, gateway, and related settings.

03

Set operating roles

Apply settings for N2N-AV transmitters, receivers, and AV endpoints.

04

Confirm changes

Device ID, name, and model updates appear immediately on the endpoint OLED.

Control access and standardize system settings

N2N Manager combines day-to-day user administration with the tools needed to maintain a consistent deployment.

USER ADMINISTRATION

Add, modify, and remove user accounts from one administrative view.

Assign the appropriate access permission for each user and manage access to sources, groups, and sites.

SYSTEM CONFIGURATION

Save application settings for consistent operation across the deployment.

Restore factory data when needed, then restart the application to apply the new configuration.

One administrative console

Manage access, maintain configuration, and support day-to-day N2N operations from the same desktop application.

Matrix Mode

From live monitoring to full-screen source viewing

Preview connected sources, arrange them on the main canvas, and view the selected source full-screen.

01

Preview

See every connected source at a glance.

02

Arrange

Drag a source onto the main canvas.

03

View

Open full-screen to monitor the active source.

04

Multiview

Choose a 2x2 layout or create a custom grid.
